Introduction

Project Title: Lonavala City Guide

Software Used: Android Studio, SQLite, RoomDataBase

Main Features:

- Provides a detail idea about the Lonavala city.
- Provided validations to the Registration, Login page, Daily Planner.
- Provides details about the hotels and the gives a direct google map access for the same also providing its official website and contact numbers.
- Provides details about the hotels and also gives us a direct google map access for the same also providing its official website and contact numbers.
- Provides details about the near by tourist destinations and the gives a direct google map access to the same also providing its official website and contact numbers.
- Provides access to the nearby hospitals in case of emergency.
- Also provides a TODO-List or say a Daily Planner which will help to create an activity, update an activity also delete an activity.

Objective

The primary objectives of the City Guide are:

- 1.To give the tourist the full idea about Lonavala City and without any third party getting involved the tourist can enjoy the place.
- 2.Seperate Login and registration page for the user to use various functionalities also provided with the validations.
- 3.Provided a google map access to the hotels, hospitals, shopping malls, etc. which will provide a direct access to the maps and provides contacts also for the same.
- 4.Feature of a TODO list is also provided, which can add an event, save the event, update the status of the event saying whether the activity is complete or incomplete which gives us an idea if we have completed the activity planned for the day.

Motivation

Motivation coming from the one amongst us is truly inspiring, same is the idea when it comes to our project. The motivation to build this application basically comes from the idea as we see many tourists people visiting our place.

These people are unaware of the places to visit, the hotels to dine in and also about various entertainment places. Our application will provide a detailed idea about everything under one roof.

The local people at times tend to cheat tourists which gives a bad impression about Lonavala, we being the people residing here always wished that the tourists visiting our place should leave with good memories about the place, so as a step for the same we have developed an application for our own Lonavala.

Project Code

1. Code for Daily-Planner or say TODO List-

-Add Task Activity

```
package com.example.lonavalacityguide.daily_planner;

import android.content.Intent;
import android.os.AsyncTask;
import android.os.Bundle;
import android.support.v7.app.AppCompatActivity;
import android.view.View;
import android.widget.EditText;
import android.widget.Toast;

import com.example.lonavalacityguide.R;

public class AddTaskActivity extends AppCompatActivity {

    public EditText etTask,etDesc,etFinish;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_add_task);

        etTask=findViewById(R.id.etAddTask);
        etDesc=findViewById(R.id.etDescription);
        etFinish=findViewById(R.id.etFinish);

        findViewById(R.id.btnSave).setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View v) {
                saveTask();
            }
        });
    }

    private void saveTask() {

        final String task=etTask.getText().toString().trim();
        final String desc=etDesc.getText().toString().trim();
        final String finish=etFinish.getText().toString().trim();

        if(task.isEmpty()){
            etTask.setError("Task Required");
            etTask.requestFocus();
            return;
        }
        if(desc.isEmpty()){
            etDesc.setError("Description Required");
            etDesc.requestFocus();
            return;
        }
        if(finish.isEmpty()){
```

```

        etFinish.setError("Finish by Required");
        etFinish.requestFocus();
        return;
    }

    class SaveTask extends AsyncTask<Void,Void,Void>{

        @Override
        protected Void doInBackground(Void... voids) {
            Task saveTask=new Task();
            saveTask.setTask(task);

            @Override
            public void onClick(View view) {
                startActivity(new Intent(MainActivity.this, HotelActivity.class));
            }
        });

        cvPlaces.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) {
                startActivity(new Intent(MainActivity.this, PlacesActivity.class));
            }
        });

        cvHospitals.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) {
                startActivity(new Intent(MainActivity.this, hospitalActivity.class));
            }
        });
    }
}
```

Steps to Run the Project

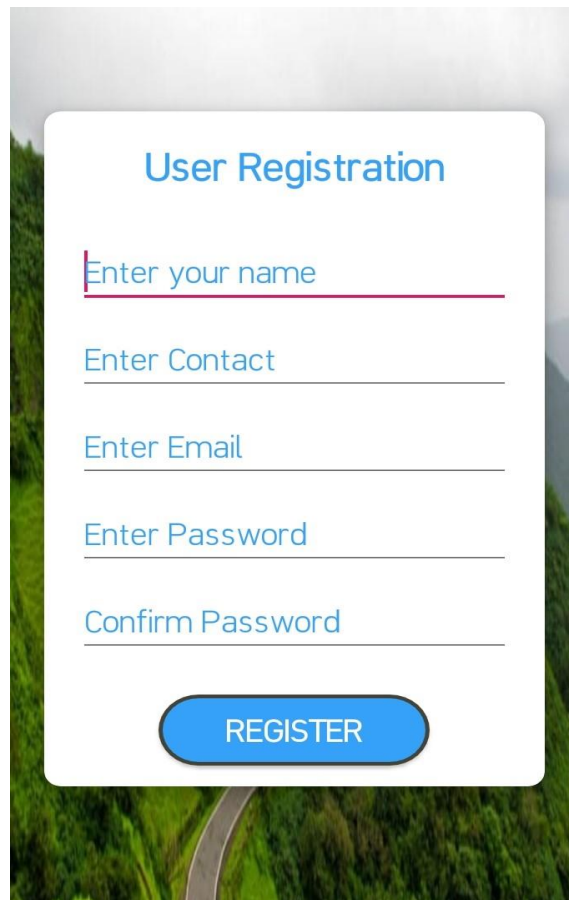

1. Open the application- **Lonavala City Guide**.

2. The **Login** page will appear.

- i.) If you have not created an account, you need to create one by clicking on the link "**Create an Account**" to the right corner of the login page.
- ii.) If registration process is done, Login in to the app by entering your email-id and password in the respective dialogue boxes.

A white rounded rectangular form titled "User Registration" in blue text is centered over a background image of a winding road through a green forest. The form contains five input fields with blue placeholder text: "Enter your name", "Enter Contact", "Enter Email", "Enter Password", and "Confirm Password". Each field has a thin horizontal line below it. At the bottom of the form is a blue rounded rectangular button with the word "REGISTER" in white capital letters.

3. After Login, the user will be directed to the main page of the application. Five modules are namely- Hotels, Places, Hospitals, PassTime and To-Do-List will appear. The user may then select whichever module in accordance to the information he/she wants.

4. The "**Hotels**" module will display a list of "**Hotels and Restaurants in Lonavala**".

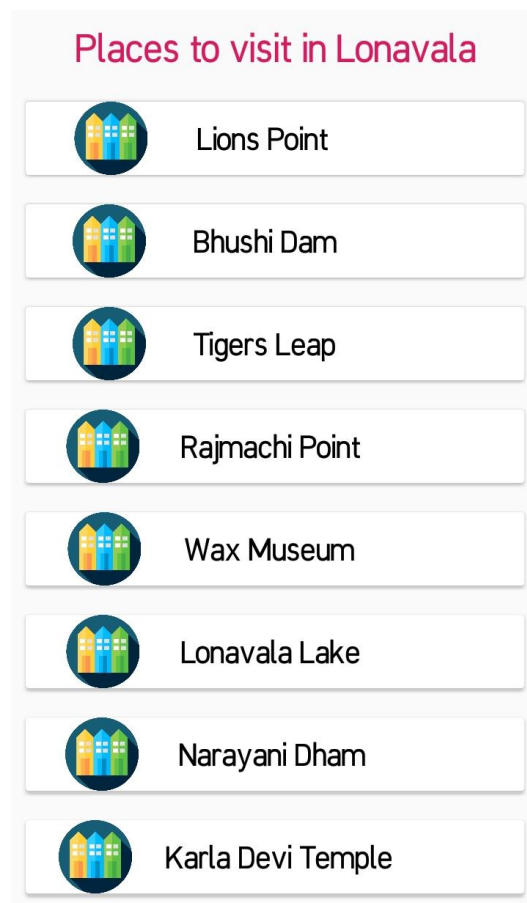

i.) On clicking on the Hotel name: Its **Description, Rating, Address, Contact number, Website**. Also you can navigate the location of the hotel on google maps by clicking on the "**NAVIGATE**" button at bottom center of the page.

5. The "**Places**" module will display a list of "**Places to visit in Lonavala**" and "Find trains" button.

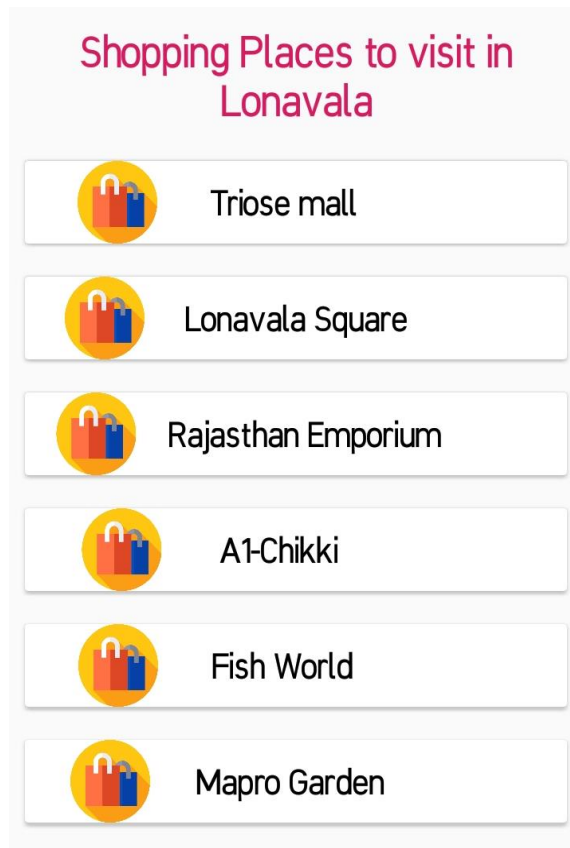

i.) On clicking on the Places name: Its **Description, Rating, Address, Contact number, Website**. Also you can navigate the location of the places on google maps by clicking on the "**NAVIGATE**" button at bottom center of the page.

ii.) On clicking on the **Find trains button**: it will direct the page to the official website of Indian Railways "**erail.in**".

6. The "**PassTime**" module will display a list of "places where you can shop and watch movies".

i.) On clicking on the **Mall/Theatre** name: its **Description, Rating, Address, Contact number and Website** will be displayed. Also you can navigate the location of the mall/theatre on google maps by clicking on the "**NAVIGATE**" button at bottom center of the page.

7. The "**Hospitals**" module will display a list of "Hospitals a tourist can visit in case of emergency".

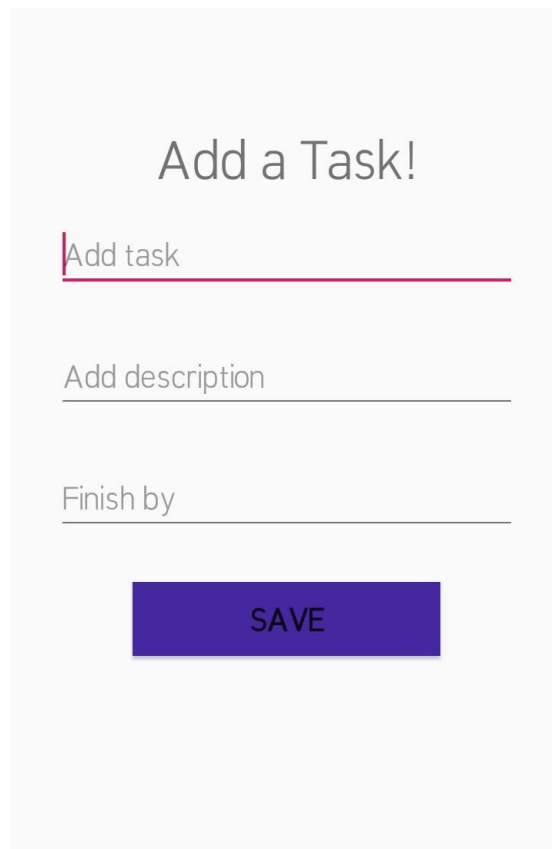

i.) On clicking on the **Hospitals** name: its **Description, Rating, Address, Contact number and Website** will be displayed. Also you can navigate the location of the Hospital on google maps by clicking on the "**NAVIGATE**" button at bottom center of the page in case of emergency.

8. The "**To-Do-List**" module on the right corner of the main page will display "**A Daily Planner List**".

i.) Here you can "**Add**" the number of tasks you want to do by clicking on the "+" button. It will direct you to other page where **Task Name, Description and Finish date** about the task will be taken. Once done, you can save the task and go back to the "**Daily Planner List**" where number of tasks will be displayed.

ii.) On clicking on any of the tasks, you can **update the task, delete the task** and mark as finished if done and it will display the task status "**completed**" above the task on "**Daily Planner List**"

The image shows a mobile application interface for adding a task. At the top, the title "Add a Task!" is displayed in a large, grey font. Below the title, there are three input fields: "Add task" (with a pink underline), "Add description" (with a grey underline), and "Finish by" (with a grey underline). At the bottom of the form, there is a blue rectangular button with the text "SAVE" in white capital letters.

Advantages and Disadvantages

Advantages:

- The app provides all the information about Lonavala city which would help the tourist to figure out various places to shop roam around also enjoy their food and have fun.
- It provides the user with list of hotels, hospitals, theatres, shopping malls and places to visit with maximum tourist attractions. So a person with zero knowledge about the city can also roam around and enjoy in Lonavala with the help of this app.
- It is an app that gives user a Daily Planner i.e a feature of the TODO List which keeps us updated about the fact whether we have completed the activities planned for the day or is there anything pending by showing it as incomplete.

Disadvantages:

- Requirement of Database for storage of data.
- It provides the information that is restricted to Lonavala City.
- Uses the traditional method of Login and registration.

Conclusion

The following can be the conclusion of the project entitled “Lonavala City Guide” application.

- Availability of all the necessary information required by the tourist under one application.
- Provides the Login and the Registration facility to the users with validation features in it.
- Provides a detailed information about the city by giving the user an complete idea about the Hotels, Hospitals, Shopping Malls and places to visit.
- Also a Daily Planner is provided for the user in order to manage all the activities and plan out the tour for the accordingly.
- In short the application will prove to be helpful to the users who know nothing about the place and they too can enjoy and make good memories.

Thank

You!
